ABOUT ME

Over the past 5 years, I've developed expertise in DevOps/DevSecOps and am currently working as a Cyber Defence Engineer. I handle a range of alerts, from phishing and email, end user compute and IAM to cloud security reports from GuardDuty/SCC/Google Sec Ops.

I'm passionate about the software development pipeline and building secure software, utilising tools like Terraform for infrastructure as code and building automations in CI/CD. I'm always eager to explore new technologies, often using my home lab for hands-on learning.

A Linux enthusiast, I've recently been exploring NixOS/Nix-Darwin to manage my development environment declaratively. I am familiar with command line tools, navigating filesystems and shell scripting.

For the past two years, I've also managed the website for the **Tobacco Factory Sunday Market**, built with Django/Python, with a fully fledged CI/CD pipeline and automated deployments.

I've also taken part in a range of community events in the local Bristol area and spoke at the Atlassian Team yearly event in Las Vegas.

EXPERIENCE

OVO Energy, Bristol - Cyber Defence Engineer

May 2024 to Present

- Building a connection between ticketing systems (Jira to ServiceNow) of our MSSP and OVO (saving £30k)
- Working with leading technologies in SOC/Threat Detection/SIEM
 - Google Chronicle/Workspace/SecOps
 - Sublime Email Security
 - CrowdStrike
 - Elastic/Kibana
 - Tines (Security Automation)
 - Wiz/Cloud monitoring
- Escalated Incident Response (Blue Team)

OVO Energy, Bristol - Developer Tooling Specialist

August 2022 - May 2024

- Cloud services optimization (AWS/GCP) for scalability, reliability, and targeted cost reduction
- Monitoring tools like Datadog and Grafana
- CI/CD and Automation, CircleCI and GitHub Actions
- Building automated vending for GCP projects
- Contributed code to internal developer platform (Backstage)
- Champion collaboration and knowledge sharing within the engineering community
- Vendor engagement and billing/cost reconciliation

OVO Energy, Bristol - Enterprise Technology Specialist

March 2021 - August 2022

- Administered and supported full Atlassian product suite
- Delivered zero-touch deployment using Mosyle, a pioneering MDM tool for Apple devices
- Linux device management solution including device scripting/hardening

OVO Energy, Bristol - Tech Support Analyst

June 2019 - August 2022

- Provided technical support and automated Jira projects for enhanced productivity
- Service Desk - Front Line Support
- Covid Office Cover

INTERESTS/SKILLS

- **Programming & Web Development:** Django | Python | HTMX | JavaScript/TypeScript | Node
- **Cloud & Infrastructure:** AWS | GCP | Terraform | Cloudflare
- **Security & Detection:** Detection Engineering | SIEM/SOC | Threat Hunting
- **Databases:** Postgres | SQLite
- **Monitoring & Alerting:** Grafana | Datadog | Chronicle | Elastic/Kibana
- **Operating Systems:** NixOS | Debian/Ubuntu/RHEL
- **Development Tools:** Git | GitHub Actions | CircleCI
- **Virtualisation & Containers:** Proxmox | Docker | LXC | Home Lab
- **Productivity & Workflow:** Atlassian/Jira | Emacs | Shell

TRAINING/OTHER

- **Web Development:** Webdev Bootcamps
- **Cloud & Security:** AWS Developer | Google Labs/Security Foundations | Immersive Labs/HackTheBox
- **Productivity & Tools:** Jira Fundamentals | Atlassian University
- **Community:** Atlassian Community Leader
